Make Every Day a Summer Day

Don't settle for "Summer only".

SunStar's solar pool heating system provide you more enjoyment in your pool, long after the summer has gone.

Capturing the immense heating power of our greatest natural energy resource, the sun, SunStar's leading-edge solar panel design lets you swim comfortably even during the cooler months. Entertain, exercise and create great memories. Extend your summer with the top heating system in the industry.

Increase your yearly pool use. SunStar's solar pool heating system provide you maximum enjoyment in your pool, long after the summer has gone.

Lasting Performance

Thanks to the reliability, efficiency and durability of its state-of-the-art system, SunStar has led the solar pool heating industry since 1977.

Double your swim season with SunStar's solar pool heating system.

Complete Quality

Rugged Construction

- Cutting-Edge Design – Unique, patented, individual tube design eliminates wear from natural expansion and contraction.
- Maintenance Free – "One piece" panel design and superior mounting system eliminates the need for rubber hoses and metal clamps.
- Storm proof – Violent storms are no match for SunStar's durable panels and mounting method.
- Quality Guaranteed – The best warranty in the business, afforded by over 30 years of experience and over 2 million collectors installed.

Maximized Efficiency

- Unique Flow System – Patented design prevents clogging or pressure build up.
- Freeze Resistant – Water escapes completely, preventing freezing and cracked tubes.
- Roof Protection – Panels "float" above roof, allowing it to breath and stay clean and dry.

Attractive and Efficient

- Roof Friendly – Innovative panel mounting system minimizes roof connections.
- Attractive Style – Multiple panel sizes blend nicely with your home
- Green Living – SunStar utilizes the ultimate environmentally friendly, cost-free, renewable energy source, the sun.
